

attached is an 800x640 pixel background, very subtle and does not interfere with the icons.

Here's how to make it your background.

1. since this is a "jpg" file, it needs to be converted to a "bmp" file. EASY with Paint shop pro
2. Open paint shop pro
3. open the file "sunset shack palette knife-800x640.jpg" by dragging it into the Paint Shop Pro window from your desktop (you have to move the file to the desktop first).
4. "save as" the same file name and select BMP(extension) instead of JPEG or JPG, thus "sunset shack palette knife-800x640.BMP"
5. Save the file ("sunset shack palette knife-800x640.BMP") to the "C:/Windows" directory:

Go to the desktop

6. Now right click the mouse on the "desktop"
7. select properties
8. select background tab
9. left click on the "sunset shack..." file.
10. click "OK"
11. the background will become that NEW file.

It is important to remember that the "background" file used is the same resolution (800x640 or other) as your photo, then it will fill the background.
